

**BRONWYN VOYCE**  
**Founder, Civic Futures Lab**  
**General Speaker Bio 2023**

Bronwyn Voyce is a former local government Councillor, experienced strategist and policy advisor, not-for-profit leader, and executive board member.

Bronwyn is a gun at creative solution design to affect systems change, and catalysing partnerships across disciplines and sectors to solve complex business and community problems.

She is passionate about advancing the circular economy as a pathway to achieving net zero.

In September 2021, Bronwyn co-founded the Great Plastic Rescue (alongside Amy Cobb) in response to the Queensland Government's single-use plastic ban. The QLD rescue collected over 3 million single-use plastic items - recycling almost 2 tonnes destined for landfills. A further 6 tonnes have been pledged in QLD in 2022. In round one of the VIC rescue, over 30 tonnes of lightweight bags have been pledged.

Prior to establishing Civic Futures Lab, Bronwyn worked across the public, private, academic, and not-for-profit sectors.

Bronwyn's previous board and voluntary roles include Chair of the Policy & Leadership Taskforce of the Smart Cities Council of Australia and New Zealand; Deputy-Chair of Regional Development Australia Far North Queensland & Torres Strait; and Program Manager of the Australian American Leadership Dialogue.

## **CIVIC FUTURES LAB**

Civic Futures Lab merges civic innovation with ESG strategy to achieve tangible impact across the private, public and third sectors. We bring scalable solutions to life – from ideation to implementation – to address the economic, social, and environmental challenges faced by cities, communities, citizens, or customers.

We collaborate with ambitious and authentic brands with shared values, to solve real problems by amplifying their commitment to ESG whilst leveraging their commercial influence to deliver impact.

We are passionate about increasing the volume of recycled plastics available for manufacturers in Australia to reduce reliance on imports and virgin plastics which carry higher carbon footprints and increase scope emissions for businesses.

The Great Plastic Rescue is proudly delivered by Civic Futures Lab.
